## **MYCROFT INC. ANNOUNCES SELF-SERVICE PORTAL TO DELIVER SECURE APPLICATION MANAGEMENT FOR PRIVATE CLOUD ENVIRONMENTS**

### ***Security Solution Provider Delivers Single Access Point to Multiple Grids for Quick Application Selection & Delivery***

**New York, NY (September 6, 2011)** – Mycroft Inc., ([www.mycroftinc.com](http://www.mycroftinc.com)) the global innovation leader in delivering IT identity and security solutions as a service, today announced the release of its self-service management portal to provide role-based access control for delivering secure virtualized applications in private cloud environments.

The Mycroft Heimdall Portal allows enterprises leveraging Mycroft Inc.'s security-as-a-service offering to quickly request, manage and view its data centers, grids and applications based on service levels and individual user roles. Unique to the industry, the new portal also provides Service Measurement Index (SMI) compliance, an emerging industry standard that helps organizations assess cloud services based on specific business and technology requirements. In addition, the Mycroft Heimdall Portal features an application deployment rapid response capability that converts business requests into technical queries for optimal interactions between IT and corporate groups.

As an integral addition to the growing Mycroft Inc. family of cloud-based products and services, this first release of Mycroft Inc.'s innovative portal sets the foundation for multi-generational functionality including a web-based single sign-on solution to deliver one access point for user on-boarding, access and federation, as well as account provisioning.

"This first release brings a new level of ease and transparency to application management within the private cloud," said Jonathan Freeman, Mycroft Inc. CIO and founder. "More importantly, the new portal is the basis for the delivery of a highly flexible, single interface for all enterprise IT security needs at a lower price point."

For more than 20 years, Mycroft Inc. has been delivering industry-leading security, identity access and management solutions to Fortune 500 customers. Mycroft Inc.

has continually set the industry mile-markers with its private cloud-based managed security service and quick-start delivery of industry proven, pre-configured products and functionality.

**About Mycroft Inc.**
