

MYCROFT MOBILEIA SECURITY SOLUTION

The Mycroft MobileIA Security Solution gives on-the-go employees secure, fast access to business data using any iOS device with the most advanced, affordable mobile security solution available.

Mycroft Inc.'s fully managed mobile offering was developed with more than 20 years of identity & access management experience behind it - so wherever employee devices travel, security is not just good, it's the best.

MOBILEIA SECURITY SOLUTION OVERVIEW

- Delivers most advanced, fully encrypted mobile security service for secure access to critical data using any iPhone or iPad
- Allows use of one device for personal & business purposes through creation of separate, secure business environment
- Retains full personal device functionality & ease-of-use
- Features widest set of standard applications & secure browsing
- Provides secure access to custom applications
- Features industry's most advanced tool set including document creation & annotation, secure browser, encrypted email, calendar, contacts, secure voice / camera
- Automatically disables or wipes data if idle for a specified period of time for protection of lost or stolen devices
- Provides customized connections to existing repositories
- Leverages FIPS 140-2, AES 256 bit encryption for business data at rest & in- transit
- Blocks "jail breaking" or the removal of enterprise protection against installing unapproved applications
- Allows file back-up through enterprise dropbox, but prevents back-up of local data
- Choice of on-site or remote management through Security Operations Centers in North America & Europe with fully encrypted, direct links using a reverse proxy from client to device
- Efficient, simple configuration & download of app ensures no interruption of existing services
- Allows integration of any application into secure business environment

AT A GLANCE

- Provides most advanced, affordable mobile security solution
- Allows secure, fast access to business data from any iPhone or iPad
- Fully managed offering with FIPS 140-2, AES 256 bit encryption
- Features widest set of standard applications & secure browsing
- Delivers secure access to custom applications
